TS OFFICE SUPPLIES

At Truska we pride ourselves in providing a timely and value for money service, we develop and then, in many cases, carry on and maintain client's web sites. We also run a remote backup service that has to be very secure and run smoothly 24/7 to allow our clients to feel comfortable that their critical business data is safe in our hands. To do this requires us to utilise a number of suppliers from secure hi-tech Data centres right down to the stationery, envelopes and other office consumables needed to full fill our obligations to our clients. TS Office supplies have been doing this for over a year now and we have never been let down.

All Office supply companies now have these big catalogues offering everything but so often at an unreasonable price. I can enthusiastically recommend Tom Skipp and TS Office supplies to any business requiring a first class service at competitive rates. Whether it is that box of paperclips, many reams of all types of paper, a stapler or a guillotine – they have supplied them all and more and most importantly delivered on time, when they were needed, and at a fair and competitive price.

Give TS Office Supplies a chance – you will not be disappointed.

Yours faithfully

David Cunningham
