Dear Al,

I would like to thank you for your help supporting our business. I am very pleased with the results so far. We have gotten business from new patients (calls that we would have missed) and we have also been more available for our existing patients which is always key.

It was really easy to set the service up and I am pleased with the polite and professional manner in which the whole thing is being handled. It really is an invisible hand helping us do our job effectively. Finally thanks for your personal support in understanding the particular needs of the business and taking care of all the details with such professionalism.

Best wishes

Adam Jaffa
